Education

INDIAN INSTITUTE OF TECHNOLOGY,
ROORKEE, INDIA

B Tech Electrical Engineering, 8.617 GPA
2024 – 2028

Skills

SKILLS

PROGRAMMING: C++, PYTHON

DATA STRUCTURES & ALGORITHMS:

COMPETITIVE PROGRAMMING: STL,
PROBLEM SOLVING

MACHINE LEARNING: NUMPY,
PANDAS, SCIKIT-LEARN

LOW LEVEL DESIGN

TOOLS: GIT, VS CODE

Languages

ENGLISH

HINDI

I am Saral Gupta, a second year Electrical Engineering student at IIT Roorkee. I am writing to express my interest in this opportunity. I am particularly interested in building strong foundations in software development, machine learning, and problem solving.

I have been actively developing my programming skills in C and C++, with a strong focus on data structures and algorithms. I am deeply interested in competitive programming and have solved over 800 problems across platforms such as LeetCode, GeeksforGeeks, and Codeforces. Through this experience, I have developed a strong understanding of algorithms, including topics such as dynamic programming, graph algorithms, greedy techniques, and advanced data structures. I enjoy tackling challenging problems and continuously improving my analytical and logical thinking abilities. I also have a strong interest in quantitative problem solving and enjoy working on mathematically intensive problems.

In addition to competitive programming, I have been exploring machine learning and its practical applications. I have worked on projects involving machine learning concepts and have experience using Convolutional Neural Networks (CNNs) in my projects. One of my notable projects includes a memory simulation project where I explored system-level concepts and implemented simulations to better understand memory behavior and performance. These experiences have helped me develop both theoretical understanding and practical implementation skills in machine learning and systems.

I would welcome the opportunity to contribute and learn from your team. Thank you for considering my application.
